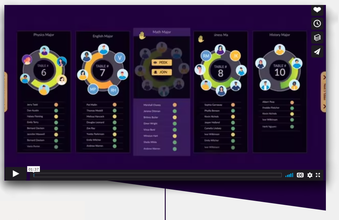
Engageli: A Dedicated Video Conferencing System For Breakout Tables

The University of Nicosia is current trialling Engageli!

Here's a link (https://vimeo.com/553472071) to an overview video!

For more information or a demonstration, contact Dr Chris Alexander at alexander.c@unic.ac.cy



engageli

Learning Reimagined.

Engageli's secure, inclusive, always on virtual classrooms are designed to recreate high-quality, small group collaborative experiences, even in a large-scale university environment.

The integrated engagement tools, such as quizzes, polls, and content sharing, as well as table seating arrangements, drive active learning and build peer-to-peer community. Instructors can use data-driven learner insights to optimize the teaching experience. Engageli also integrates with the most popular Learning Management Systems.

Built by educators,

it's learning reimagined.

Built To Create Community Through Social, Flexible, and Active Learning

Small collaborative groups support dynamic, frictionless interactions that coexist within a larger class setting, much like study groups in a well-designed active learning classroom.

- Learning groups of 2-10 per table
- Polls and quizzes integrated into class materials, no need for additional tools
- Synchronized, high-quality video clips controlled by the instructor
- Open and moderated class group discussion modes
- Peer-to-peer ionstruction without interfering with the rest of the learning environment

> *Engageli is the best I have used by far for synchronous online work.*
>
> *Brian Barrett*
> *Department Chair, University of Miami*

Instructor Features

- Open, or instructor-assigned, virtual table seating
- Concurrent access for hundreds of students
- Hand raising functionality for orderly class discussion
- Interactive polls and quizzes
- Support for multiple instructors
- Student participation engagement metrics for optimization

Learner Features

- Chat with tablemates, the class, or instructors
- Threaded Q&A functionality
- Anonymous instructor feedback
- Downloadable notes feature with time-synced lecture screenshots and annotations
- Study halls for smaller asynchronous group discussions and recorded seminar replay
