Type of Course Elective	Field Communications	Language of Instruction English
Level of Course 1 st Cycle	Year of Study 3 rd	Lecturer Dr Mike Hajimichael
Mode of Delivery Face-to-face	Work Placement N/A	Co-requisites None
Recommended Optional Programme Components: N/A		

Objectives of the Course:

- Enhance and develop an analytical and theoretical understanding of popular music.
- Explore the triangulated relationship of production and exchange between artists, music companies and audiences.
- Consider how popular music and the industry have been affected by digitization and the internet.

Learning Outcomes:

After completion of the course students are expected to be able to:

1. Have an in-depth background on popular music theories.
2. Acquire an in-depth knowledge of how The Music Industry functions with regard to the processes of production and performance.
3. Develop a grounded understanding of how to conduct ethnographic research in the local context on a specific music scene.
4. Be able to conduct a spherical contextual analysis of how songs work and are interpreted by different audiences.

Course Content:

1. Outline of the development of theories on popular music – from 1930's to present.
2. Analysis of key theoretical arguments – from Adorno to Straw.
3. Explanation of the production process and the music industry.
4. Communication as a process in the recording studio context.
5. Aesthetics, logic and different music scenes.
6. The problem with audiences and diverse interpretations.
