UNIVERSITY of NICOSIA

Course Syllabus

Course Code	Course Title	ECTS Credits
COMP-529DL	Network Defense and Countermeasures	10
Prerequisites	**Department**	**Semester**
COMP-514DL	Computer Science	Fall/Spring
Type of Course	**Field**	**Language of Instruction**
Required for CyberSecurity concentration	Computer Science	English
Level of Course	**Lecturer(s)**	**Year of Study**
2nd Cycle	Dr Sotiris Ioannides	2nd Year
Mode of Delivery	**Work Placement**	**Corequisites**
Distance Learning	N/A	N/A

Course Objectives:

The main objectives of the course are to:

- present the layered defense approach to securing systems.
- present risk assessment as a technique to protect assets and information.
- expose students to security policy design and implementation.
- expose students to practical techniques that aim in defending computer networks from network attacks and malicious software.
- provide a comprehensive view of contemporary network defensing technologies.
- motivate the need to integrate security in the system development lifecycle to better protect the system.

Learning Outcomes:

After completion of the course students are expected to be able to:

1. discuss a wide range of network attacks.
2. apply risk assessment techniques related to security threats.
3. identify network attacks (denial of service, flooding, sniffing and traffic redirection, inside attacks, etc.) and basic network defense tools.
4. identify various types of malicious software and use countermeasure defense/detection tools.

5. apply practical ways to harden Web and Internet Resources, as well as Operating Systems.
6. create a solid enterprise-wide information security infrastructure, including analyzing the security needs of the enterprise, designing a strategic plan to address the security requirements, selecting the appropriate tools to implement the security organizational policies, and establishing recovery techniques from disruptive and destructive information security events.

Course Content:

1. Network Security Threats, Attacks, and Vulnerabilities.
2. Using Layered Defense Strategy: defense in depth.
3. Attack Classification and Examples of Attacks.
4. Risk Analysis: threat and risk assessment, economic impacts, techniques for minimizing risk.
5. Security Policy Creation: security policy lifecycle, security policy development and best practices, handling security incidents (response team, responding procedures, etc.), business continuity.
6. Network Attacks Landscape: network reconnaissance, attack techniques, malicious code, countermeasures.
7. Analysis of Network Traffic: CVE identifiers, signature and traffic analysis, identification of suspicious events.
8. Web and Internet Resources: hardening DNS servers, Web Servers, Routers
9. Hardening Operating Systems: configuring properly Windows, Unix, Android, patching.
10. Network Defensing Technology: Intrusion Detection and Prevention Systems, Firewalls, VPN, Proxy Servers, Honeypots, Antivirus, etc.
11. Security Management and Standards.
12. Security in the System Development Lifecycle: Initiation Phase (security categorization), Development and Acquisition Phase (risk assessment, security functional requirements analysis, security plan), Implementation Phase (technology best practices, security control testing plan), Maintenance Phase (continuous monitoring plan).

Learning Activities and Teaching Methods:

Lecture, individual work, hands-on experience with tools, case studies

Assessment Methods:

Lab Exercises, Assignments, Semester Project, Final Exam

Required Textbooks / Readings:

Title	Author(s)	Publisher	Year	ISBN
Guide to Network Defense and Countermeasures, Third edition	Randy Weaver, Dawn Weaver, Dean Farwood	Cengage Learning	2013	1133727948
Network Defense and Countermeasures: Principles and Practices, Second Edition	William (Chuck) Easttom, II	Pearson IT Certification	2014	0789750945

Recommended Textbooks / Readings:

Title	Author(s)	Publisher	Year	ISBN
Analyzing Computer Security: A Threat / Vulnerability / Countermeasure Approach	Charles P. Pfleeger and Shari Lawrence Pfleeger	Prentice Hall	2012	0132789469
