### **Objectives of the Course:**

This course allows the faculty and the Department to organize a class to focus on new developments in the field or topics that cannot adequately be covered in the structured courses of the programme. The course may end with a final examination or a student project or a written/oral report.

### **Learning Outcomes:**

Students are able to apply problem-solving skills developed during the special topic they choose; understand the background and context of the special topic, and its application to the industry; and present findings of independent study

### **Assessment Methods:**

This is determined in collaboration with students and lecturers and is defined by the outcomes and content developed for the special topic.

### **Required Textbooks:**

| Authors | Title | Publisher | Year | ISBN |
|---------|-------|-----------|------|------|
|         |       |           |      |      |
|         |       |           |      |      |
