

Course Code ENVM-485	Course Title Environmental and Energy –Related Internship	ECTS Credits 6
Department Life and Health Sciences	Semester Fall / Spring	Prerequisites None
Type of Course Major Elective	Field Environmental and Energy Management	Language of Instruction English
Level of Course 1 st Cycle	Year of Study 4 th	Lecturer(s) Dr Marios Valiantis
Mode of Delivery face-to-face	Work Placement N/A	Co-requisites None

Objectives of the Course:

This course involves the student in essentially experiential learning through the placement of the student for a period of time with an oil or gas or energy-related organization. The time period may be 10 days abroad or 20 working days (4 weeks) in Cyprus. This can be a continuous period or several smaller periods adding up to the same total.

Learning Outcomes:

Course Content:

Teaching Methods:

Assessment Methods:

Students are evaluated based on the activities that precede, coincide or follow the internship

1. Students are evaluated based on the activities that precede, coincide or follow the internship.
2. During the internship, students are expected to keep a Daily Log in which they record the types of activities involved together with notes on what they have visited, done, experienced, learned or attracted their attention and interest. Faculty are expected to either be with the student or visit the students and his/her supervisor periodically. Organizations are under no obligation to pay, but may pay if they wish, a stipend to the student doing an internship.
3. Following the internship, students will write a report in which they include elements referred to points 1 and 2 above as well as the recording and analysis of the learning that has taken place.
4. For this course, students may get a letter grade (A to D1) or opt for a Pass-Fail option.
