

Course Syllabus

Course Code	Course Title	ECTS Credits
IMPH-510	Final Project/ Διπλωματική Εργασία	30
Prerequisites	Department	Semester
To finish successfully all courses, CPA ≥ 2.0	Health Sciences	Fall/Spring
Type of Course	Field	Language of Instruction
Compulsory	Pharmacy	Greek/English
Level of Course	Lecturer(s)	Year of Study
1 st Cycle	All Faculty	5 th
Mode of Delivery	Work Placement	Corequisites
Face-to-Face	N/A	N/A

Course Objectives:

The aims of this module are to enable students to examine critically and apply the principles and practices of an aspect of pharmacy through original research

The aims of this module are to enable students to:

- acquire the knowledge and skills to formulate a research question
- present and defend research findings and implications
- examine critically and apply the principles and practices of an aspect of pharmacy through original research

carry out a research investigation

Learning Outcomes:

After completion of the course students are expected to be able to:

- make effective use of different sources of information (literature, clinical data, laboratory data, interview/questionnaire data, evaluation of services, etc) that contribute to existing knowledge on the selected topic
- apply appropriate methods for analysing information and data collected to address the hypotheses/questions/problems, issues associated with the selected topic and the aim of the project

- discuss and/or challenge subject related theory, models, and opinions
- critically interpret information and data within the context of existing, published materials, including the wider implications of the project
- draw conclusions in the interpretation of the collected information and data and to propose possible avenues for future study
- present the findings of the project in a style and quality appropriate to a research report
- plan and carry out a research investigation
- gather, analyse, and interpret information and data obtained during a research investigation
- present, justify and defend the findings and implications of the research in the form of a research project

Course Content:

To carry out an independent research project (either lab based, bibliographic or applied research) and submit a written report of 10,000 to 15,000 words.

Learning Activities and Teaching Methods:

Discussions, lab work, research

Assessment Methods:

Coursework, reports, presentation of the Final Project

Required Textbooks / Readings:

Title	Author(s)	Publisher	Year	ISBN
Conducting Your Pharmacy Practice Research Project	Smith, Felicity	Pharmaceutical Press	2010	9780857110022
