### Course Objectives:

The main objectives of the course are to:

- Advance the general understanding of the student and to inform a particular design.
- Introduce students to a range of design research methods.
- Construct a research program that informs and inspires the conceptualisation process for their major design project.
- Enable students to display initiative in developing and pursuing their project, and to demonstrate their capacity to arrive at understandings that can significantly enhance the sophistication with which they approach their major design project.
- This course will support the student's development of a thesis topic and breadth of project through exercises of self-reflection, critical awareness and analysis.

### Learning Outcomes:

After completion of the course students are expected to be able to:

1. Create a top quality final year research project which is a thesis topic of the student's choice and is presented as written thesis report/booklet
2. Discuss, communicate and negotiate on different levels, executive and policymaking, with parties concerned, on organizational, financial and content aspects.
3. Utilize speech and writing on the boundaries and challenges of the profession and the own vision, specialism and technical capabilities.
4. Demonstrate capability to apply methodological research to aspects of the professional field.

5. Identify and analyze data and requirements regarding purpose of use, including historical, cultural, actual, functional, ergonomic and technical aspects.
