<b>Mode of Delivery</b> Face-to-face	<b>Work Placement</b> N/A	<b>Co-requisites</b> None
<b>Recommended Optional Programme Components:</b> N/A		

## Objectives of the Course

This course aims to provide a conceptual understanding of the function of financial markets, the flow of funds, levels of interest rates and interest rates differentials. It will analyse the institutional framework through a discussion of the theoretical background to the structure and performance of the financial system, and the role, goals and decision-making process of financial intermediaries participating in financial markets' operations. Using the rich body of empirical evidence, it will analyse the international integration of financial markets and institutions, consider the policy implications with emphasis on global developments, and contrast these issues with the relevant theory. It will develop the analytical and research skills of the student using a specific problem or issue related to markets and institutions.

## Learning Outcomes

\After completion of the course students are expected to be able to:

1. Demonstrate how the financial markets operate;
2. Analyse the structure and operation of financial institutions participating in the financial markets;
3. Assess the need for market supervision and regulation;
4. Compare empirical evidence to the theoretical background;
5. apply analytical skills to specific problems and issues related to financial markets and financial institutions; and
6. Explain the structure and the performance evaluation of the financial system and the role, the goals and the decision-making process of financial intermediaries.
