

Course Code MBA-723	Course Title Financial Risk Management	ECTS Credits 7.5
Department School of Business	Semester Fall, Spring, Summer	Prerequisites MBA-612/MBA-622
Type of Course Elective	Field Finance	Language of Instruction English
Level of Course 2 nd Cycle	Year of Study 2 nd	Lecturer Dr Geoff Turner
Mode of Delivery Face-to-face	Work Placement N/A	Co-requisites None
Recommended Optional Programme Components: N/A		
Objectives of the Course		
<p>This course aims to develop a knowledge and understanding of financial risk, including the market risk resulting from economic conditions, liquidity risk, credit risk, operational risk and commodity risk. It provides an understanding of the various financial instruments available and how they may be used to counteract unwanted financial risk and to optimise the opportunities available to organisations that are prepared to take on various degrees of financial risk, either as defensive moves or in the implementation of dynamic strategies.</p>		

Learning Outcomes

After studying this course, students should be able to:

1. Demonstrate an understanding of the nature, importance and the need to control financial risk;
2. Acquire a working knowledge of the nature of the treasury function, including roles, responsibilities, organisation, performance measurement and relevant accounting guidelines;
3. Demonstrate an understanding of the nature and function of derivative financial instruments within an organisation's risk management structure;
4. Apply the principles of risk management instruments and strategies to interest rate, currency and commodity hedging; and
5. Communicate the results of their evaluation in an appropriate form to all interested parties.

Course Content

Introduction to financial risk management: Understanding, in an organisational context, the term "Financial Risk Management" including an overview of financial markets and instruments, derivative products and performance measurement.

The treasury organisation: Understanding of the functions of a treasury department and design and develop an organisational structure, and performance measurement criteria, for the department that ensures effective accountability.

Identifying major financial risks: Understanding how financial, or accounting, ratios can help in assessing the financial position and financial performance of an organisation.

Interest rate risk management: Identify the types of interest rate risk management products and how to identify, quantify and manage interest rate risk.

Foreign exchange risk management: Identify the types of foreign exchange risk management products and how to identify, quantify and manage foreign exchange exposure risk.

Credit risk management: Identify the types of credit risk management products and how to identify, quantify and manage customer credit risk.

Commodity risk management: Identify the types of commodity risk management products and how to identify, quantify and manage commodity risk.

Operational risk management: Examine and understand the nature of operational risk and identify appropriate operational risk management products.

Measuring and accounting for risk: Determine how an organisation should account for the various forms of risk management products so that it complies with international accounting and financial reporting standards and establish a suitable governance framework over financial risk management.

Global initiatives in financial risk management: Understand the current issues in financial risk management from around the world and examine their relevance, or appropriateness, to the local environment.

Learning Activities and Teaching Methods

Lectures, in-class exercises, case study analysis and discussion, and discussion of topical articles appearing in academic or professional journals or newspapers.

Assessment Methods

Coursework (case study, management report or academic essay), Mid-semester test, Final examination.
