Course Objectives:

The main objectives of the course are to:

- An analysis of the measures, economic mechanisms and required implementation of the National and Common Agricultural Policy.
- Interpreting the implementation mechanism of each agricultural policy measure.
- Description and analysis of the regulatory framework of the CAP, with a focus on the operation of the food market, through the exploitation of agricultural policy tools and mechanisms.
- Interpretation and evaluation of all alternative policies in the field of agriculture.
- Interpretation and evaluation of the impact from the implementation of agricultural policy measures, through the application of economic theories.
- An analysis of the productivity and competitiveness of the agricultural sector, through economic tools and models.
- Viewing agricultural product and food trade policy issues, through the operation of International Organizations.

Learning Outcomes:

After completion of the course students are expected to be able to:

- Have knowledge of the meaning and content of agricultural policy, and know how to analyze its formulation mechanisms.
- Be aware of the legislation and regulatory framework of the Common Agricultural Policy, in the production and trade of agricultural products. Also, have knowledge of the changes and orientation of CAP measures.
- Describe and analyze the position of agriculture in the national and global economy, and its impact on social economy.
- Analyze the mechanisms of implementing the agricultural policy in each agricultural sector and, more specifically, on basic agricultural products. Moreover, analyze and evaluate the trading policy measures for agricultural products and food.
- Use various “tools” to monitor and be continuously updated about changes, developments and reviews of the CAP.
- Become familiarized with the feasibility of including agricultural holdings and enterprises in agricultural development programs, within the framework of the CAP.
- Apply and valorize each agricultural policy measure, as an agricultural enterprise executive, and as an agricultural development consultant in general, with the aim of improving the competitiveness of agricultural enterprises.
- Apply and valorize financing measures and programs, during the operational organization of agricultural and animal breeding structures.
