Course Objectives:

The main objectives of the course are to:

The course's purpose is to offer to the students an understanding of the general principles and topics related to International Political Economy. The course aims in assisting students to comprehend the issues and topics which are expected to appear in an interrelated world. Special attention is given to the global economic developments and the major problems and challenges faced in the EU and the Eurozone.

Learning Outcomes:

After completion of the course students are expected to be able to:

1. Comprehend the importance of international political economy in the context of the international economic and political events.
2. Critically evaluate contemporary economic trends and problems by making use of the knowledge obtained through the course.
3. Make use of theoretical knowledge in order to analyze and evaluate case studies within the framework of the course's topic.
4. Use IT skills (word processing, Internet and e-mail) as study and communication tools.
5. Have the learning skills to allow them to partake in research of international phenomena with a minimal amount of assistance.
6. Make efficient use of libraries, bibliographical material and academic research
