

Course Code PSY-740	Course Title Evidence Based Practices	ECTS 7.5
Department Social Sciences	Semester Spring	Prerequisites None
Type of Course Required	Field Clinical Psychology	Language of Instruction English
Level of Course 3 rd Cycle	Year of Study 1 st	Lecturer Marios Adonis
Mode of Delivery Face-to-face	Work placement N/A	Co-requisites None

Objectives of the Course:

This course provides a foundation in a way of thinking and an outline of major empirically validated intervention methods. The major goal of the course is a basic familiarity with empirically validated approaches to assessment and treatment. This course will provide students with a familiarity with certain empirically validated interventions along with the focus on the treatment techniques appropriate for certain disorders, such as anxiety disorders, and depression.

Learning Outcomes:

After completion of the course students are expected to be able to:

1. Explaining and teaching the philosophy of, the advantages and limitations of evidence based treatments.
2. Appreciate the basic principles and methods in psychotherapy that may apply across most disorders;
3. use the current research literature on the efficacy of specific treatments for specific disorders;
4. apply methods of assessment and interventions of several empirically supported treatments for mood, anxiety, and personality disorders in adults.

Course Contents:

1. Assessment in Evidence-Based Practice
2. Structured and Semistructured Diagnostic Interviews
3. Panic Disorder and Agoraphobia
4. Specific and Social Phobia

5. Generalized Anxiety Disorder
6. Obsessive–Compulsive Disorder
7. Posttraumatic Stress Disorder
