**Objectives of the Course:**

This practicum aims to familiarize students with primarily the site of KESY and the overall administrative and clinical work they will need to be doing during their placement at this practicum. It involves a combination of presentations from practicing trainee psychologists, group discussions and experimental instruction, in the application of techniques of psychological intervention. Group supervision and role playing will also be used in teaching how to initiate and achieve a therapeutic relationship with both adults and children.

**Learning Activities and Teaching Methods:**

Presentations, Group discussion and Role-playing
