*Elective for Counselling Psychology

Course Objectives:

The main objectives of the course are to:

- This is the second of a two-semester thesis sequence during which students are expected to actively work on their selected topic using the methodology they developed over the course of the previous semester. By the end of this semester, students are expected to submit a completed project of either original empirical research or original theoretical research. The final project, which will be graded by the main thesis supervisor and a second grader, must be to a publishable standard.

Learning Outcomes:

After completion of the course students are expected to be able to:

1. To follow the methodology that was designed over the course of the previous semester.
2. To discuss the research results and conclusions the students has arrived at.
3. To utilize knowledge in the field of clinical psychology to critically assess the completed work and identify possible limitations.
4. To critically identify the ways in which the completed project advances knowledge in the field of clinical psychology.
5. To familiarize students with the publication guidelines of the American Psychological Association.
