| Mode of Delivery | Work Placement | Corequisites |
| Face-to-face | Clinical Practicum sites | PSYC-712 |

Course Objectives:

This is the first of a two-semester sequence (with an optional third semester) and it consists primarily of supervised clinical practice at various training sites. Over the course of their clinical practicum, students are engaged in the direct provision of psychological services, including crisis intervention, assessment and psychotherapy.

Learning Outcomes:

After completion of the course students are expected to be able to:

1. To introduce students to all aspects of clinical practice.
2. To allow students to apply the skills, techniques and knowledge they have acquired to clinical practice.
3. To support students in upholding and maintaining the highest ethical and professional standards.
4. To help students begin to develop a professional identity as clinical psychologists.
5. To introduce students to the process of receiving individual and group clinical supervision.

Course Content:

N/A

Learning Activities and Teaching Methods:

Clinical practice, individual and group supervision

Assessment Methods:

Assessment of clinical practicum is based on the written evaluations of individual and group supervisors for each trainee.

Required Textbooks / Readings: N/A
