Face-to-face	Clinical Practicum Sites	PSYC-713

Course Objectives:

This is the second of a two-semester sequence (with an optional third semester) and it consists primarily of supervised clinical practice at various training sites. Over the course of their clinical practicum, students are engaged in the direct provision of psychological services, including crisis intervention, assessment and psychotherapy. By the end of this practicum phase students will have completed 1000 hours of supervised clinical practice.

Learning Outcomes:

After completion of the course students are expected to be able to:

1. To further enrich students' ability to engage with various aspects of clinical practice.
2. To allow students to practice the skills, techniques and knowledge they have acquired to clinical practice.
3. To support students in upholding and maintaining the highest ethical and professional standards.
4. To help students in the development of a professional identity as clinical psychologists.
5. To facilitate students' personal and professional growth through individual and group clinical supervision.
6. To help students to complete all legal requirements so as to be able to apply for professional registration to the Cyprus Council for the Registration of Psychologists.
