

INFO SESSION

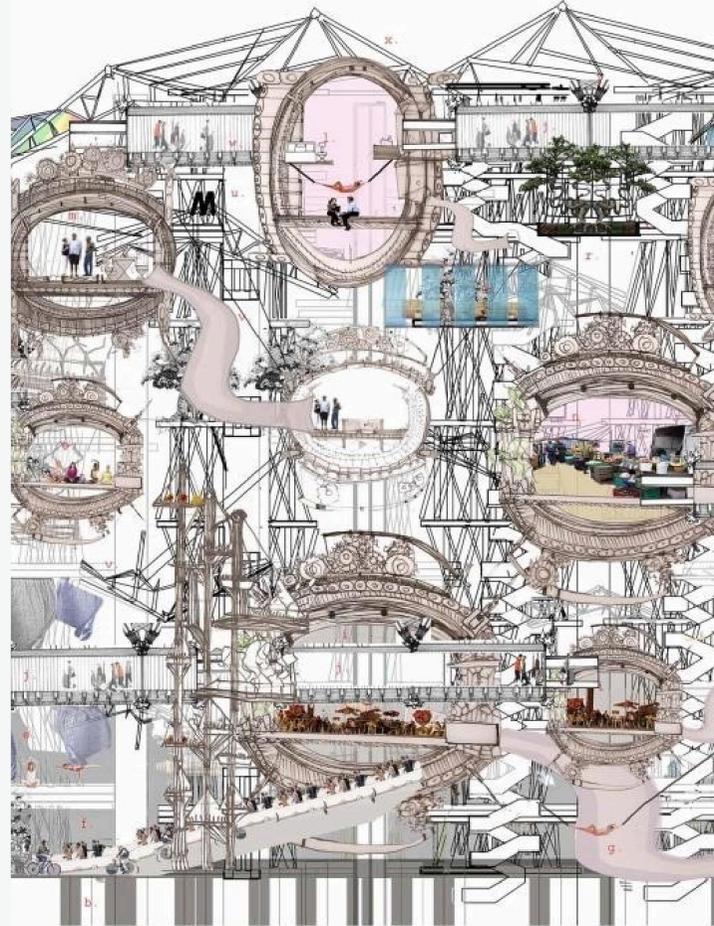

BECOMING AN ARCHITECT AND INTERIOR DESIGNER ON A WONDERFUL SATURDAY MORNING

Saturday, 28 February 2026
09:30-15:00

Architecture Research Centre,
University of Nicosia

PROGRAMME

09:30-10:00 | Registration

10:00-10:30 | Welcome | Brief Presentation of the Department of Architecture, University of Nicosia | Presentation of the 3D printer and laser cutting/engraving machine (during which participants will receive custom made keepsakes)

10:30-12:30 | Architecture & Interior Design Workshop “Youthful Sky_Scrapers”

As part of a broader dialogue on environmental and social sustainability, the vertical growth of contemporary cities is emerging as a practical alternative to horizontal expansion, which increasingly claims natural and cultivable land.

We invite students to brainstorm and develop a series of creative concepts for ‘Sky_Scrapers’ designed for young people and university students, envisioned on the skyline of Nicosia.

Each proposal should imagine not only living and study areas but also include essential shared spaces: community kitchens and dining areas, a library, places for rest and relaxation, gardens and parks, gyms, and any other functions that would support a vibrant vertical student community.

Students are free to express their ideas using mixed media—drawing, collage, recyclable materials, magazine clippings, photocopies, or any creative method they find suitable.

12:30-13:30 | Lunch Break

13:30-14:30 | Continuation & Completion of the Workshop

14:30-15:00 | Work Presentations and Open Discussion

15:00 | Certificate Ceremony and Departure

UNIVERSITY
of NICOSIA | DEPARTMENT OF
ARCHITECTURE
