Ever wondered how far medicine can go?

Ever looked into a special type of medicine?

Ever wanted to meet the cutting edge of the profession?

Ever wished to be part of the future?

Ever thought how you would treat an alien?

We have what you're looking for!

SPACE MEDICINE!

The final frontier of medicine is coming to a lecture hall near you!

The *Field, Emergency and Wilderness Medicine Society* is happy to invite you to hear about the ultimate wilderness setting, challenges of future (and present) medicine and become acquainted with the amazing aspects of the new field of our profession!

Guest lecture by a former president of the International Academy of Air and Space Medicine

MONDAY, MARCH 6th 16:00-18:00 (lecture hall TBA)

The lecture is open to **all** students, staff **and** faculty!

In order for us to be prepared, please fill out the form at TInyURL.com/FEWspace

**Disclaimer: Lecture might not include treatment of aliens…*
