

WELCOME LETTER

Dear honorable professors,
esteemed fellow students,

The Organizing Committee welcomes you to the 1st Multi-thematic Medical Student Clinical Conference, by the University of Nicosia medical students and the ΟΚΥπΥ of Cyprus, which we are happy to bring to you, here in Paphos.

The Medical Program brings together medical students from every continent, as represented here today. The Paphos General Hospital, as with other hospitals in 4 countries, allows the Clinical-Years trainees to witness real cases and apply their copious theory studies to the provision of effective patient care.

To the honorable professors and respected medical experts present, we would be filled with gratitude if you could enlighten us with your knowledge and experience. We greatly value your expertise and will always continue to do so.

Fellow colleagues, the whole idea of this Conference is not to aimlessly accumulate information. Our goal is to inspire and spark our thirst for inquisitiveness and allow us to exchange our experiences and discuss our findings.

After all, as Plutarch said;

“The mind is not a vessel to be filled but a fire to be kindled.”

Plutarch, (47-129 A.D.) Ancient Greek Historian.

We would particularly like to thank Dr. Joseph Mouritis for coordinating and chairing this seminar, in the manner of his Grand Round talks.

We hope that you all enjoy this first-of-its-kind event.

-The Organizing Committee of the 1st Multi-thematic Medical Student Clinical Conference
